LIST OF REVISIONS

1. Revision List

- A. This Illustrated Parts Catalog includes the original issue and the following listed revisions. To ensure that information in this manual is current, the revisions must be incorporated in the manual as they are issued.

Original Issue - 3 February 1997

Revision Number	Date	Revision Number	Date
1	1 November 1997	12	4 April 2005
2	16 October 1998	13	2 January 2006
3	16 April 1999	14	3 July 2006
4	15 October 1999	15	1 January 2007
5	31 March 2000	16	1 July 2007
6	1 November 2000	17	1 December 2007
7	18 June 2001	18	1 January 2009
8	18 December 2001	19	1 July 2010
9	1 July 2002	20	1 January 2012
10	7 July 2003	21	1 July 2012
11	1 March 2004	22	1 Jul 2013

2. Export Compliance

- A. This publication contains technical data and is subject to U.S. export regulations. This information has been exported from the United States in accordance with export administration regulations. Diversion contrary to U.S. law is prohibited.

ECCN: 9E991

CESSNA AIRCRAFT COMPANY
MODEL 182 (SERIES 1997 AND ON)
ILLUSTRATED PARTS CATALOG

INTRODUCTION

1. Purpose

- A. This Illustrated Parts Catalog (IPC) includes the illustration and identification of replacement parts and assemblies necessary for maintenance of the specified aircraft model. The Catalog gives the information available at the time of publication.

Refer to the Maintenance Manual, not to this Illustrated Parts Catalog, for removal and installation procedures. The airplane operator must use the applicable rules to establish the status or airworthiness of the airplane.

- B. This IPC is prepared in accordance with the Air Transport Association 2200 Specification Format.
- C. Chapter 11 contains procurable placards. Country designated placards are specified by foreign certification authorities and put into groups identified by an International Civil Aviation Organization (ICAO) identifier in the page footer.
- D. Placards identified by the Code of Federal Regulations (CFRs) include: cockpit information, including instrument markings and any related limitations, aircraft operating limitations, power plant and auxiliary power unit instruments, flight control markings, fuel, oil, door and emergency exit information, limitations on storage compartments, loading, passenger cabin safety, and safety equipment operation.
- E. Through service bulletin and publication revisions as well as reissues and temporary revisions of technical publications, this information is updated, supplemented, and automatically amended.
- F. It is recommended that users keep access to these amendments, which are specifically incorporated within the Illustrated Parts Catalog through the subscription services of Cessna Propeller Aircraft Customer Services and/or information received from Cessna-authorized service stations. The subscription services are available by phone at 316-517-5800, by fax at 316-517-7271 or 316-942-9006, or by written request to 2121 S. Hoover, Wichita, KS 67209, US.

WARNING: ALL INSPECTION INTERVALS, REPLACEMENT TIME LIMITS, OVERHAUL TIME LIMITS, INSPECTION METHODS, LIFE LIMITS, AND CYCLE LIMITS RECOMMENDED BY CESSNA ARE GIVEN FOR CESSNA-APPROVED NEW OR REMANUFACTURED PARTS OR PARTS FROM OVERHAUL. IF ENTITIES OTHER THAN CESSNA DESIGN, FABRICATE, REFABRICATE, MAKE PARTS FROM OVERHAUL, AND/OR GIVE APPROVAL OF COMPONENTS OR PARTS, THEN THE DATA IN CESSNA'S MAINTENANCE AND SERVICE MANUALS AND PARTS CATALOGS DO NOT APPLY, AND THE PURCHASER, THROUGH THIS WARNING, IS TOLD NOT TO APPLY THE DATA IN THIS CATALOG TO NON-CESSNA PARTS. ALL INSPECTION INTERVALS, REPLACEMENT TIME LIMITS, OVERHAUL TIME LIMITS, INSPECTION METHODS, LIFE LIMITS, AND CYCLE LIMITS FOR SUCH NON-CESSNA PARTS ARE RECEIVED FROM THE MANUFACTURER AND/OR SELLER OF SUCH NON-CESSNA COMPONENTS OR PARTS.

- G. This Catalog does not include inspection, maintenance, and parts requirements for Supplemental Type Certificate (STC) installations. When an STC installation is incorporated on the airplane, an inspection is necessary in accordance with the inspection program published by the owner of the STC for the parts of the airplane for which the installation has an effect. Since STC installations can change 1) the system's interface, 2) operation qualities, and 3) component loads or stresses on adjacent structures, it is possible that Cessna's inspection specifications will not apply to airplanes with STC installations.

CESSNA AIRCRAFT COMPANY
MODEL 182 (SERIES 1997 AND ON)
ILLUSTRATED PARTS CATALOG

2. Effectivity

- A. Numbers in the effectivity column show the serialization limits for the part. For example, the numbers 0001 in the "Effect From" column and the number 0023 in the "Effect To" column show that the part is used on airplanes 1 through 23. If the right column adjacent to the figure title is blank, the figure is applicable for all serials. If the right column adjacent to the indented installations, assemblies, or part numbers is blank, the part is applicable for all serials.

NOTE: Information in this Illustrated Parts Catalog is applicable to U.S. and Foreign Certified airplanes. Parts for foreign certified airplanes are identified by applicable serialization and by special note.

3. Compact Disc (CD-ROM)

- A. Publications for this aircraft model are available through print and electronic media CD-ROM (Compact Disc – Read Only Memory). The print issue is available by publication type, such as the Maintenance Manual or the Illustrated Parts Catalog, while the electronic media puts all publications together in a group on CD's. Regular revisions keep these publications current.

4. Part Number Index (Paper)

- A. Part Numbers in the Numerical Index are shown in sequence, in accordance with (first) the extreme left digit, then (second) the next digit to the right. This sequence continues throughout the numbers, from left to right. The digits are shown in the sequence of: space, decimal, slash(/), symbol (such as #), numbers in numerical order, then alphabetical letters.
- B. The Part Number Index is a complete listing of all parts included in the Detailed Parts Lists.

5. Nomenclature

- A. The indentation system used in the detailed Parts List of this Catalog shows how the parts are related. For a given item, the indentation code shows a system, installation, or general heading that starts in the extreme left position and continues down into columns in sequence, until the end detail is completed. Refer to Figure 1.
- B. The degree of indention of each item shows how the items are related. For example, the Battery Installation is in the first indention of the nomenclature column. The Battery Assembly Manifold is the subsequent lower assembly and is shown in the second indention of the nomenclature column. Refer to Paragraph A, General System of Assembly Order.
- C. If two or more assemblies contain a majority of identical parts or if the assemblies are left and right counterparts, the assemblies are in sequence. The subsequent indented assemblies or detail parts apply to both higher-level assemblies, with the different parts coded to show that they are used on the specified, applicable assembly.
- D. Attaching parts are shown immediately after the item to be attached and before any detail parts for the item. Attaching parts are shown with the same indention as the item they attach and include the caption "Attaching Parts". The end of the attaching parts list is followed by the symbol" ---*---.

Order of Assembly
Figure 1

- E. The indenture of a component part shows if it is a part of an assembly or if it is independent of the assembly. Components independent of an assembly have the same indenture as the assembly. Components of an assembly are identified by an additional indenture and follow any attaching parts for the assembly.

6. List of Effective Pages (Paper Versions)

- A. A List of Effective Pages in the front of each chapter of the Illustrated Parts Catalog shows all pages within the chapter in sequence, with the current revision date for each page. A revised List of Effective Pages is included for each Illustrated Parts Catalog revision.

7. Revision Filing Instructions (Paper Version)

- A. Regular Revision
- (1) Refer to the List of Effective Pages of each chapter when you add a revision.
 - (2) Pages changed by the revision will be indicated by the revision date on the page and on the List of Effective Pages for that chapter. The revised page replaces the existing page in the catalog.
 - (3) Existing pages no longer needed in the catalog are indicated by "Deleted" on the List of Effective Pages. These pages are to be removed and discarded. When a page has been deleted by a revision, the List of Effective Pages for subsequent revisions do not list the page.
- B. Temporary Revisions
- (1) Put pages of a Temporary Revision in the applicable chapter in accordance with the filing instructions on the first page of the Temporary Revision.
 - (2) Temporary Revisions should be removed from the catalog only when replaced by a revision to the catalog or by instructions noted on the superseding Temporary Revision.

8. Revision Indicators

- A. Additions, deletions, or revisions to the Parts List are identified by the letter "R" in the right margin of the page adjacent to the change or addition. When technical changes cause unchanged text to show on a different page, an "R" is shown in the margin opposite of the affected items.

9. Cessna Part Numbering System

- A. The basic number identifies the Cessna drawing only. Each installation, assembly or detailed part is assigned a part number and includes a seven-digit drawing number and the applicable dash number. Refer to Figure 2.

CESSNA AIRCRAFT COMPANY
MODEL 182 (SERIES 1997 AND ON)
ILLUSTRATED PARTS CATALOG

B1516

Part Number System
Figure 2

10. Standard Parts

- A. Many parts having standard usage have been incorporated into the Cessna Standard System. Parts in this group are designated with the part number prefix "S", "CM", or "C".
- B. Parts for standard hardware items such as screws, nuts, clamps, etc., are designated with the standard part number prefix "AN", "NAS", or "MS".

11. Page Numbering System

- A. The Page Numbering System in the Illustrated Parts Catalog has three-element numbers with dashes between the numbers, with the figure number, page number and date printed to the side. Refer to Figure 3.

B1518

Page Numbering System
Figure 3

12. Part Number Column

- A. This column contains the manufacturer's part number used to identify the item.

13. Units Per Assembly Column

- A. The quantity listed in the Units Per Assembly column is the quantity used per item. The quantity shown for attaching parts is the quantity necessary to attach only one item. To find the total quantity necessary to attach more than one item, multiply the quantity of attaching parts by the number of items to be attached.

14. Symbols and Part Number Terms

- A. When the term, "REFER TO", is in the Nomenclature column and the Units Per Assembly column shows "RF", the figure referred to will be the next highest assembly of the referred item.

CESSNA AIRCRAFT COMPANY
MODEL 182 (SERIES 1997 AND ON)
ILLUSTRATED PARTS CATALOG

- B. When the term, "DELETED-NOT USED", appears in the Nomenclature column, it signifies that the index number was used but is no longer required. This procedure is used to eliminate re-indexing of all items following the deleted part.
- C. When the letters BKI (Bulk Item) are in the Nomenclature column and the Units Per Assembly column indicates "AR" (As Required), refer to Cessna Service Parts Center for prices and units of measure.

15. Abbreviations Commonly Used

ALT	Alternate	IPC	Illustrated Parts Catalog
AR	As Required	NP	Non-Procureable
ASSY	Assembly	RF	Reference
BKI	Bulk Item	SB	Service Bulletin
FSO	For Spares Order	TR	Temporary Revision

16. Bulk Items

- A. Items such as flexible air hose, rubber moldings and channels, and windshield sealing strips are shown in the Parts List as bulk items (BKI).
- B. A bulk item is supplied in the bulk or cut length or quantity for an installation.

17. Serial and Color

- A. When you make an order for upholstered material, carpet, or interior trim, make sure that you include the airplane model and serial number. This information makes sure that you receive the correct color combination.

18. Modification Kits

- A. A record of modification kits and service bulletins is in the Modification Kit List section in the front section of the catalog.
- B. The Modification Kit List shows the kit number and title, issue date for the kit, service bulletin or applicable document number, and catalog incorporation date.

19. Definition of Text Page Information

- A. Refer to Figure 4.
 - (1) The Figure number is the illustration for the highest-level assembly specified in the applicable Parts List.
 - (2) The number in the indented Item column is the index number shown to call out that item or that part in the applicable illustration.
 - (3) When the item number for a part has a dash before the number, it is not specified on the illustration.
 - (4) A number in the Units Per Assembly (Units Per Assy) column is the quantity of the part used in the next-higher-level of the assembly or installation.
 - (5) A number in the Effectivity (Effect From To) column shows that the manufacturer uses the part only on specified airplanes, that is, for airplanes within a serial number range given in the Effectivity column.
 - (6) The AR in the Units Per Assembly (Units Per Assy) column is for those parts with the quantity "As Required."
 - (7) When an alternative part number applies to a part, it is shown immediately after the part which it can replace. The entry ALT FOR in the Nomenclature column refers to the alternative part number.
 - (8) A USED ON or USED WITH note in the Nomenclature column includes the next higher assembly of a part when the part does not apply to all of the next higher assemblies that are given immediately before the part.

CESSNA AIRCRAFT COMPANY
MODEL 182 (SERIES 1997 AND ON)
ILLUSTRATED PARTS CATALOG

- (9) Parts that are used only on a left or right installation or assembly include LH or RH in the Nomenclature column.
- (10) When an installation or assembly has RF in the Units per Assembly (Units per Assy) column, that installation or assembly also is in the Parts List for the cross-reference figure specified in the Nomenclature column. The numerical Units-Per-Assy data is given only in the cross-reference figure.
- (11) When the Parts List page shows the letter R in the right margin, the R refers to the addition or revision of text for that line in the Parts List of the applicable IPC revision.
- (12) A Supplier's part number is identified in the Part Number column and the federally supplied vendor code follows the nomenclature in the Nomenclature column.

20. How to Use the Catalog if the Part Number is Known (Paper Version)

- A. Refer to Figure 5.
 - (1) Find the part number in the Part Number Index.
 - (2) Refer to the chapter, section, subject, figure, and item number.
 - (3) Go to the chapter, section, subject, and figure.
 - (4) Find the part on the illustration and in the part number column by item number..

21. How To Use Catalog If Part Number Is Unknown (Paper Version)

- A. Refer to Figure 6.
 - (1) Refer to the Alphabetical Index.
 - (2) Refer to the main group in which the part is listed..
 - (3) Go to the chapter, section, subject and figure number in which the part should be shown..
 - (4) Go to the illustration and find the part.
 - (5) Refer to the corresponding item number in the part number column.

MODIFICATION KIT LIST

1. List of Incorporation

A. The following service bulletins and modification kits have been incorporated into this manual.

Modification Kit Number	Title	Service Bulletin Number	Modification Kit Date	Manual Incorporation
MK172-25-07	Crew Seat Recline Modification	SB04-25-01	Jun 14/2004	Apr 4/2005
MK172-32-01	Nose Landing Gear Wheel Fairing Modification		Sep 29/2003	Jan 1/2012
MK182-22-01B2	182 KAP Auto Pilot	SB98-22-01	May 15/1998	Oct 16/1998
MK182-22-03	Altitude Preselect Upgrade for Dual Axis Autopilot		Nov 30/2001	Mar 1/2004
MK182-24-01	Electrical Power System	SB99-24-01	Mar 15/1999	Oct 15/1999
MK182-24-02	Circuit Panel Assembly Cover Installation	SB 99-24-02	Dec 27/1999	Mar 31/2000
MK182-24-03	Heavy Duty Battery (24V) Installation	SNL99-10	Sep 13/1999	Mar 31/2000
MK182-25-01	Manual Adjust Restraint Assembly Installation-Crew Seat	SNL00-9	July 03/2000	Mar 31/2000
MK182-25-01A	Manual Adjust Restraint Assembly Installation-Crew Seat	SNL00-9	Oct 16/2002	Mar 1/2004
MK182-25-02	Automatic Push Button Release Restraint Assembly-Crew Seat	SNL00-9	July 03/2000	Mar 31/2000
MK182-25-03	Automatic Push Button Release Restraint Assembly-Bench Seat	SNL00-9	July 03/2000	Mar 31/2000
MK182-25-04	Manual Adjust Restraint Assembly Installation-Bench Seat	SNL00-9	July 03/2000	Mar 31/2000
MK182-25-08	Inflatable Seat Restraints Installation	SB05-25-02	April 25/2005	Jan 2/2006
MK182-34-02	Garmin G1000 GCL-69A Flight Information System Installation	SB05-34-06	July 29/2005	Jan 2/2006
MK182-37-01	Vacuum Hose Modification	SB 99-37-01	Dec 27/1999	Nov 1/2000
MK182-53-01	Firewall doubler and Engine Cowl Shock Mount Inspection/Installation	SB99-53-01	Mar 8/1999	Oct 15/1999
MK182-55-01	Horizontal Stabilizer Abrasion Boot Installation	SB99-55-01	Apr 16/1999	Mar 31/2000
MK182-55-01B	Horizontal Stabilizer Abrasion Boot Installation	SNL06-7	Jul 20/2010	Jan 1/2012
MK182-71-01	Alternate Air Door Assembly Hinge Replacement	SB97-71-01	Nov 3/1997	Nov 1/1997
MK182-71-01A	Alternate Air Door Hinge Assembly Replacement	SB 97-71-01 Rev 1	Jul 27/1998	Jul 1/2002
